# BLUE BITE

Connected Products U.S. Consumer Trend Report

In June 2022, 500 adults aged 18-65 were surveyed online across the USA. Quotas were applied on age and gender to reflect the US population profile. All respondents were users of modern smartphones (Apple or Android, acquired since 2015), and they had all purchased something from at least one of the following categories in the past 12 months:

#### Consumer packaged goods

(e.g., food, beverages, clothes, makeup, household products)

Luxury goods (e.g., designer jewelry, clothing, watches or bags)

**Lifestyle apparel** (sports apparel, footwear, athleisure)

#### Wine and spirits

At Blue Bite, we recognize the critical importance of keeping in touch with how consumers interact with connected products so that we may more deeply understand how brand experiences can be enhanced and made more relevant through the use of QR codes and NFC tags.

The 2022 Blue Bite Connected Products U.S. Consumer Trend Report was developed with response data generated from a selfadministered consumer survey conducted by a global leader in market research.

## Key Findings

## 78%

of most consumers already engage with brands in a range of ways, but aren't always happy about it. 92% aware of QR.
73% have a high usage of QR.

## 49%

of users, note regular usage of contactless payment.

People *under 35* are much more familiar with both technologies.

feel they arefeel it'scontactednot alwaystoo often.relevant.

**57%** Over half are more likely to buy a product if they've connected with the

73%

packaging.

This figure is high among those under 35, and luxury shoppers.

When consumers consider connecting technologies, there is little separating QR and NFC in their perception of innovativeness

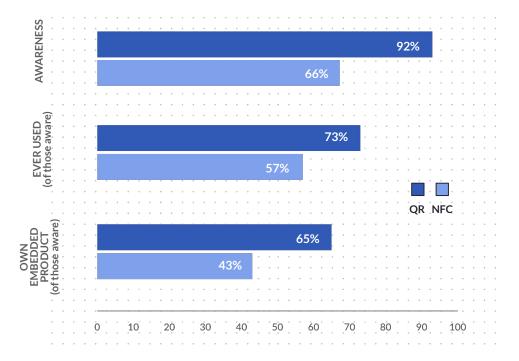

Among those aware of them, 3 in 5 rank them highly innovative.

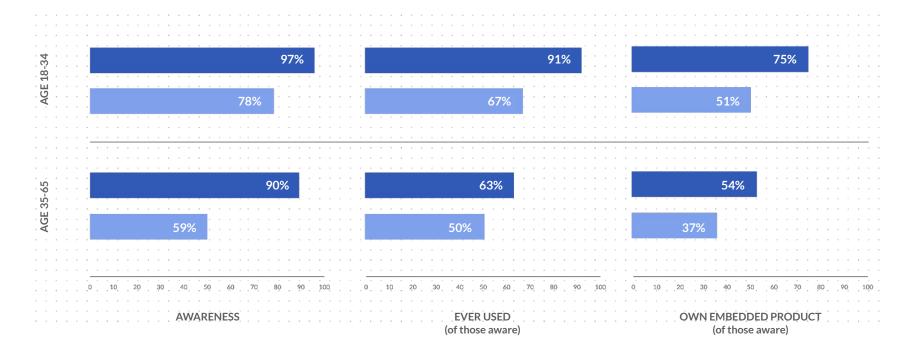

60% FOR QR CODE

61% FOR NFC

#### Awareness, usage and ownership are higher for QR than NFC

Q: What is your perception of QR codes: Old school- innovative, Base: aware of QR codes (n=462) What is your perception of NFC: Old school- innovative, Base: aware of NFC (n=329)

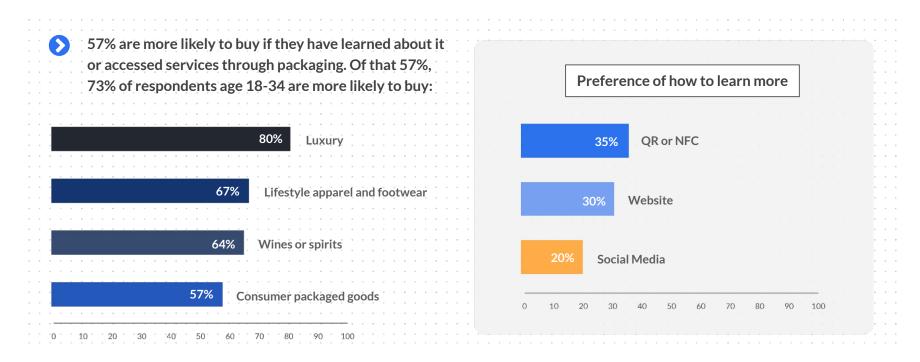

#### For both categories, awareness, ownership and usage are being driven by those under 35, highlighting them as a key target audience.

Most consumers—and almost all under 35—have had some kind of engagement with brands. Product recommendations are the top engagement.

$\begin{array}{c c c c c c c c c c c c c c c c c c c $		Engage	ements with brands	s over last 12 months		
70       70 <td< th=""><th>dations</th><th></th><th>po e e e e e e e e e e e e e e e e e e e</th><th>re abc notion oduct vut the</th><th>itio itio itio itio itio</th><th>No communication in the past 12 months:</th></td<>	dations		po e e e e e e e e e e e e e e e e e e e	re abc notion oduct vut the	itio itio itio itio itio	No communication in the past 12 months:
	Product reco	Customer ser to a produ		to learr duct or l story of ed more	No communicat the past 12 mo	4% 4%
	40.			ai L Fear		33% 33%
		· · · · · · · · · · · · · · · · · · ·			22%	0 10 20 30 40 50 60 70 80 90 100

Consumers (particularly those under 35 and buyers of luxury goods) are more likely to buy a product or service if they have learned more about it through its packaging.

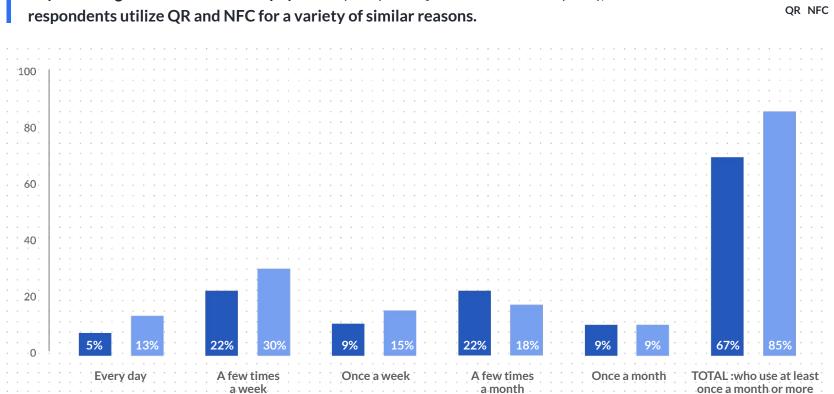

### What do consumers like about communicating with brands?

### 9

Over half like knowing what promotions are available. Their main complaints are being contacted about things they don't care about or too often.

	56% Knowing what promotions are available
44	8 Being recommended products I might like
34%	Learning more about what the brand stands for
	40. 50. 60. 70. 80. 90. 100.

35%	They contact me too often
21%   ofter	n find it hard to contact brands when I have an issue

## Beyond using NFC for contactless payments (49%) and QR to access menus (42%),

#### Other Top Reasons for Use of QR and NFC

Learning more about brands and checking authenticity are key services for which consumers find QR and NFC useful.

# Learning more about the brand?

Almost three-quarters of respondents said learning more about consumer packaged goods would be useful, suggesting consumers want to take the time to learn more at all price points.

😟 CALL OUT

Younger consumers generally associate more products with connected packaging services, with the exception being over-the-counter and prescription drugs across all services.

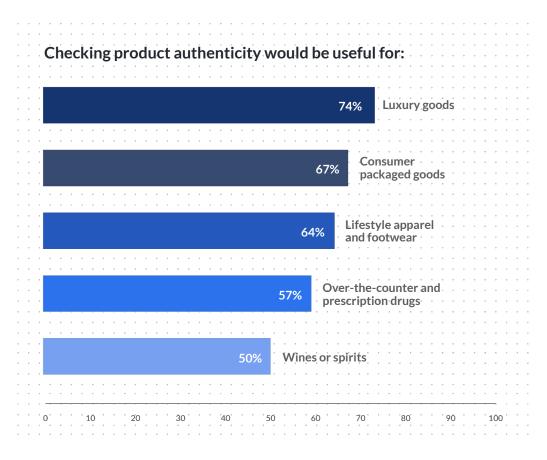

While younger consumers are generally more engaged, this suggests older respondents can be encouraged to connect if the experiences are tailored to them.

# Checking product authenticity?

### 8

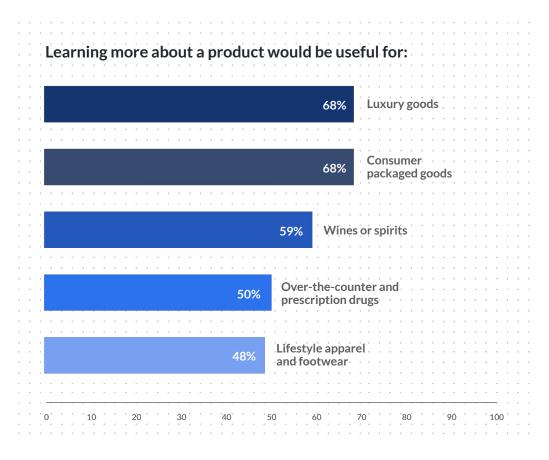

Unsurprisingly, given the emphasis on it within the industry, luxury goods are the key area for checking product authenticity.

# Learning more about products?

### 9

Luxury goods and CPG scored highest on consumers' desire to learn more about products, with wine or spirits not far behind.

# Learning about sustainability

### 0

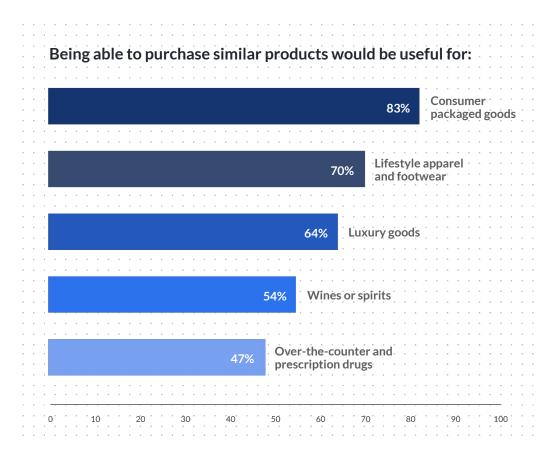

After CPG, lifestyle apparel and footwear ranks highly in the desire for knowledge about sustainability, potentially highlighting concerns around fast fashion.

### Learning more about a product's sustainability would be useful for Consumer 76% packaged Lifestyle appare 64% and footwear 60% 49% Wines or Over-the-counter and 47% prescription drugs

### Being able to purchase similar products would be useful for:

### 0

Consumers expressed greatest interest in purchasing similar products in the CPG category.

## **About Blue Bite**

The world's leading connected products platform, Blue Bite empowers brands to open a new two-way, interactive digital communication channel with consumers through the simple scan of a QR code or NFC tag.

The patented Blue Bite Experience Suite® allows brands to create and deliver personalized mobile experiences at scale using an intuitive, brand-managed software platform. Blue Bite's dynamic and contextual ability to update messaging in real time throughout the product lifecycle delivers an unprecedented experience that builds consumer engagement and loyalty, uncovers actionable insights, accelerates sales, reduces churn, and provides product authentication and traceability.

Founded in 2007, Blue Bite is a leading brand of Markem-Imaje, a global product identification and traceability solutions leader.
